

***Physical Science  
Week 3  
September 12-16***

**Dear Parents,**

Last week we were well into our first chemistry chapter. We ended the week with several labs emphasizing density and volume, both measurements of matter. This week we will wrap up our labs and learn about electrolysis in a demonstration using copper chloride. **Our first chapter test will be on Friday.** Here is what we will be working on this week: ☺

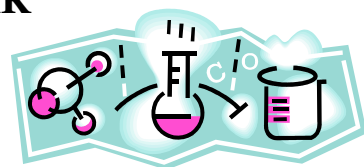

**Monday:** Wrap up labs and correct homework packets

**Homework: New vocabulary & 1-2 R&R**

**Tuesday:** Wrap up particles of matter

Vocabulary due\*

**Homework: Section 1-3 R&R**

**Wednesday:** Read/discuss copper recovery

Electrolysis demonstration

**Homework: Finish Copper Recovery Quest.**

**Thursday:** Chapter review

**Friday:** Correct chapter review & **TEST**

*Enjoy your weekend!!*

**New Vocabulary:**

- a. weight   b. mass   c. International System of Units
- d. density   e. chemical bond   f. molecules
- g. electrode   h. electrolysis
